## Abstracts

Title insurance is a form of indemnity insurance predominantly found in the United States which insures against financial loss from defects in title to real property and from the invalidity or unenforceability of mortgage loans. The vast majority of title insurance policies are written on land within the United States. Unlike some land registration systems in countries outside the US, the US states' recorder of deeds generally do not guarantee indefeasible title to those recorded titles. Title insurance will defend against a lawsuit attacking the title, or reimburse the insured for the actual monetary loss incurred up to the dollar amount of insurance provided by the policy.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Title Insurance market covering all its essential aspects.
