Abstracts

Toothbrush Manufacturing Machine is a machine to make toothbrush. The toothbrush is an oral hygiene instrument used to clean the teeth, gums, and tongue. It consists of a head of tightly clustered bristle--atop of which toothpaste is supposed to go--mounted on a handle which facilitates the cleaning of hard-to-reach areas of the mouth. Toothbrushes are available with different bristle textures, sizes, and forms. Most dentists recommend using a soft toothbrush since hard bristled toothbrushes can damage tooth enamel and irritate the gums.
