Abstracts

Towbars are also known as trailer hitches. Towbars are used for pulling trailers, carriers, or campers for both commercial and leisure purposes. Trailers, carriers or campers are attached to the rear of a vehicle by towbars and pulled forward. Towbars are attached to the vehicle chassis. They consist of a neck with a towball at one end which helps the towbar to pull the carrier or trailer. Towbars are used when engine breakdown occurs or if a vehicle is not in working condition and needs to be pulled to the service station by another vehicle which has a towbar attached to its chassis.
