Abstracts

Radar control system is an equipment of providing air traffic control services with the use of radar. The provision of air traffic control services without the use of radar is called procedural control. With the evolution of technology, the requirement of transportable radar control system was generated. Transportable radar control system (TRCS) is a compact air traffic control system transportable by a truck, aircraft or helicopter.

Transportable Radar Control System (TRCS) is used for air traffic communication, navigation, and surveillance. It ensures safety and efficiency in the operation of aircraft, organizes the flow of air traffic, and helps to avoid collision of aircraft. ATC equipment enables air traffic controllers to communicate with the aircraft, provides navigational services, and monitors and manages the air traffic.
