## **Abstracts**

A tug boat is a type of boat that maneuvers large container ships, tankers and cruiser ships by pushing or towing them in and around dockyards and harbors. These boats are also used to maneuver disabled ships and other non-self-propelled vessels, such as oil platforms. Tug boats are also used to steer large ships to create sideway movements in narrow seas and harbors. Due to their strong engine capacity, tug boats are also used as icebreakers and salvage boats – they are capable of breaking through one meter thick ice.
