## Abstracts

Tyre bead wire is used in all kinds of automobile tyres, tyres of earth moving equipments and aircrafts. The main function of bead wire is to hold the tyre on the rim and to resist the action of the inflated pressure, which constantly tries to force it off. Bead wire is the crucial link through which the vehicle load is transferred from rim to the tyre, which prevents vibration during driving. It significantly affects the safety, strength and the durability of tyres. Bead wire is a drawn steel wire, which is manufactured from quality wire rods with high carbon content. Bead wire's surface is coated with copper or bronze which ensures proper adhesion with the used rubber compound.
