## Abstracts

Urgent care apps are smart phone applications that can be remotely accessed. They can notify nurses and doctors about emergencies. These apps allow the user to speak to a registered nurse who can answer the user's medical questions, and if needed a licensed physician can call within a few minutes. In addition, users or patients who are seeking medical care, be it for themselves or others, especially during emergency or specialty care, can use these apps and receive the required help from online doctors. Based on the Urgent Care Apps market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
