## Abstracts

A vape product or broadly known as e-cigarette, electronic cigarette, and vaporizer is a battery operated device and has been reckoned as an alternative to traditional tobacco cigarettes by many vendors. Without the inhalation of smoke, it gives the experience of tobacco smoking where the user inhales the vaporized nicotine emitted by the device. Based on the Vape market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
