Abstracts

Variable speed pumps let user control speed, whether low or high speed, or anywhere in between. Most of these energy-saving pumps are driven by a different type of motor (known as a permanent magnet motor) from the first two pumps. This type of motor is used in magnetic resonance imaging (MRI) machines and electric vehicles. It is usually more efficient than induction motors in single and two speed pumps.

Based on the Variable-speed Pump market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields.
