Abstracts

Vehicle retarders are friction-based brake systems used to enhance or replace some of the main functions of equipment, usually in heavy-duty vehicles. Vehicle retarders are used to decelerate vehicles, which are often used as an additional 'assist' to slow down the vehicle, completing the final brake with a conventional friction brake system. Due to the low use of friction brakes, especially at higher speeds, their service life is increased, and since the brakes are pneumatic in those vehicles, they also contribute to saving air pressure.
