Abstracts

Vendor Neutrality Archive (VNA) is a step further of PACS (picture archiving and communication systems) and the concern of vendor neutrality (freedom from vendor imposed limits) is of prime importance in VNA. Picture Archiving and Communication System (PACS) is a medical imaging technology which enables easy storage and access to images in a digital way. PACS has a capability to handle images from different medical imaging equipment such as positron emission tomography (PET), endoscopy (ES), ultrasound, magnetic resonance, radiography, mammograms, etc. Based on the Vendor Neutral Archive market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
