Abstracts

Virtual Pipeline Systems are arranged shipments of gas from one point to another, either overland in containers by rail or road, or by water, in ocean-going or coastal tankers and barges. Virtual pipeline systems supply natural gas to industries that are either too geographically challenging to justify an investment in pipeline construction or too small for normal LNG large-scale carriers. Virtual pipeline systems supply natural gas to industries, electricity generation plants, and commercial & residential customers almost anywhere that are accessible by road or sea.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Virtual Pipeline System market covering all its essential aspects.
