Abstracts

Waterborne industrial coatings mainly refer to industrial coatings with water as solvent or dispersion medium. Waterborne industrial coatings include three types: water diluted industrial coatings, water soluble industrial coatings, and water dispersible industrial coatings, which are mainly used in the fields of wood, automobiles, rail transit, engineering machinery and equipment, ships, marine engineering, and energy. Water soluble industrial coatings take water soluble resin as film-forming material, polyvinyl alcohol and its various modifiers as representatives, in addition to water soluble alkyd resin, water soluble epoxy resin and inorganic high molecular waterborne resin. The biggest advantage of waterborne industrial coatings compared with solvent based coatings is low VOC emissions.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Waterborne Industrial Coatings market covering all its essential aspects.
