## Abstracts

Watermelon is a plant species in the family Cucurbitaceae, a vine-like (scrambler and trailer) flowering plant originally from Africa. It is cultivated for its fruit.

The watermelon, one of the world's largest fruits, is actually a berry with a thick, smooth rind and a fleshy interior that grows on a flowering vine. While most people think of watermelons as having green rinds and rosy centers, they can actually range from white, yellow, light green, spotted and streaked in color on the outside, to shades of pinks, reds and shocking orange-yellows on the inside. They also vary drastically in size and weight, and can be oblong, oval or spherical in shape. Some are even grown inside glass containers to achieve a cubical form.
