Abstracts

Watermelon is a plant species in the family Cucurbitaceae, a vine-like (scrambler and trailer) flowering plant originally from Africa. It is cultivated for its fruit.

The watermelon, one of the world's largest fruits, is actually a berry with a thick, smooth rind and a fleshy interior that grows on a flowering vine. While most people think of watermelons as having green rinds and rosy centers, they can actually range from white, yellow, light green, spotted and streaked in color on the outside, to shades of pinks, reds and shocking orange-yellows on the inside. They also vary drastically in size and weight, and can be oblong, oval or spherical in shape. Some are even grown inside glass containers to achieve a cubical form.

The Watermelon market revenue was xx Million USD in 2016, grew to xx Million USD in 2020, and will reach xx Million USD in 2026, with a CAGR of xx during 2020-2026.

Global Watermelon Market Development Strategy Pre and Post COVID-19, by Corporate Strategy Analysis, Landscape, Type, Application, and Leading 20 Countries covers and analyzes the potential of the global Watermelon industry, providing statistical information about market dynamics, growth factors, major challenges, PEST analysis and market entry strategy Analysis, opportunities and forecasts. The biggest highlight of the report is to provide companies in the industry with a strategic analysis of the impact of COVID-19. At the same time, this report analyzed the market of leading 20 countries and introduce the market potential of these countries.
