Abstracts

Watermelon is a plant species in the family Cucurbitaceae, a vine-like (scrambler and trailer) flowering plant originally from Africa. It is cultivated for its fruit.

The watermelon, one of the world's largest fruits, is actually a berry with a thick, smooth rind and a fleshy interior that grows on a flowering vine. While most people think of watermelons as having green rinds and rosy centers, they can actually range from white, yellow, light green, spotted and streaked in color on the outside, to shades of pinks, reds and shocking orange-yellows on the inside. They also vary drastically in size and weight, and can be oblong, oval or spherical in shape. Some are even grown inside glass containers to achieve a cubical form.

Based on the Watermelon market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
