Abstracts

A web-based seminar (webinar) is a conference that is hosted in near real-time over the Internet. Webinars allow groups in remote geographic locations to listen and participate in the same conference regardless of the geographic distance between them. Webinars also have interactive elements such as two-way audio (VoIP) and video that allows the presenters and participants to discuss the information as it is presented. Webinar Software is a kind of software for web-based seminar.
Based on the Webinar Software market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
