## Abstracts

Wet Pet Food foods have significantly higher moisture content than dry pet foods because they contain about 70-85% water mixed with dry ingredients. The transportation and shipping of wet pet foods are more expensive than dry pet foods. Hence, wet pet foods are priced higher than dry pet foods. As wet pet foods have more protein and fat contents than dry pet foods, pets often perceive wet pet food to be tastier than dry pet foods. Also, most of the wet pet foods do not contain any preservatives, and so, are meant for quick consumption.

Based on the Wet Pet Food market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
