Abstracts

Wooden flooring includes both solid wooden flooring and engineered wooden flooring. Solid wood is milled from a solid piece of lumber and shaped to add the required grooves to the edges and ends. It is made in thicknesses of 3/4 inches to 5/16 inches. Engineered wood is assembled into panels with three to 10 layers of wood and ranges from a 1/4 inch to 3/4 inches in thickness.

Based on the Wooden Floor market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
