Abstracts

Cross-linked polyethylene (XLPE) is a high-quality insulation material with excellent electrical properties. Power cables account for the important component of power networks that are used in transmission and distribution. Thus, cables need huge attention as they are more prone to hazards and accidents. They are typically used in power transmission & distribution. The cables are insulated with a variety of materials such as Polyvinyl chloride, polyethylene, polyurethane, nylon, ethylene propylene diene monomer, thermoplastic elastomers, and many others, but XLPE is the best insulating material due to its ability to hold short circuit current capacity.
