Abstracts

Yarn Lubricant is a daily chemical product that imparts a soft and pleasant feel to clothing and fabrics during handling, wearing and use. The lubricating and softening effect of the lubricant is mainly to reduce the weaving interruption head after use, and is suitable for various natural fibers, chemical fiber yarns and blended yarns thereof. Since the lubricant is adsorbed on the surface of the fiber, the fiber is prevented from directly contacting the fiber, thereby reducing The dynamic friction coefficient and static friction coefficient between the fiber and the fiber reduce the resistance between the fabric components and the resistance between the fabric and the human body, so as to achieve a soft, smooth and comfortable wearing effect.
