Abstracts

The advent of Clean Tech requires us to look more broadly, probably quite differently, but above all more creatively - at defense and armed force and at the role Clean Tech is likely to play in those. Military officials say that safer sources of power are needed to enhance national security. That's a bigger motivation than reducing emissions.

The business of selling Clean Tech is not much different from other businesses. In other businesses too we also have different layers that interact with each other

The report "Global Clean Energy for Defense Market and Technology Forecast to 2026" examines, analyzes, and predicts the evolution of Clean Energy technologies, markets, and outlays (expenditures) over the next 8 years - 2018-2026 in the Defense Industry. It also examines Clean Energy markets geographically, focusing on the top 95% of global markets, in the United States, Europe, and Asia.

Throughout the report we show how Clean Tech is used today to add real value. To provide the most thorough and realistic forecast, this report provides a twin-scenario analysis, including "steady state", emergence of new Clean Energy tech in the Defense industry.
