Abstracts

The Global Military Armored Vehicle Market is expected to grow from USD 24 Billion in 2019 to USD 31.2 Billion in 2027. The cumulative market is expected to reach USD 247, predominantly governed by the Asian market. This market is expected to account to more than 30% of the total market. The increase in defense spending in this region, coupled with the increase in upgrade programs are expected to drive spending in this region. Most of the countries are now developing their own indigenous programs for both local use and for exports. China initiated their indigenous MRAP program and started exporting these vehicles in 2014. Other countries like India have also developed indigenous versions of armored vehicles. One of the key drivers for an indigenous program is the ability to optimize cost.

The life cycle cost of Military Armored program is a key challenge, the maintenance cost of an armored vehicle platform is around one- third of the life cycle cost. Few key areas of cost optimization include MRO, Collective Upgrades, Batch COTS procurement and Joint program development. The high cost associated with the logistics and repair of the MRAPs in Afghanistan led to US Army scrapping equipment worth around USD 7 Billion during the withdrawal of US troop. The other dynamics that affect the market include the changing warfare patterns and the higher focus towards hi-tech programs.

The nature of warfare has evolved from open field environment to close combat scenario. The threats on an Armored Vehicle has increased from traditional RPG to Improved Explosive Devices. The most commonly used IEDs are the remotely operated, vehicle driven, pressure based and suicide vest. In the years, 2008-2011, more than 50% of the casualties were due to IED related deaths in Afghanistan. The USD 45 Billion MRAP program helped in curtailing the casualties, it is estimated that MRAP program saved close to 40,000 lives according to Government sources. The

program lasted for about six years and still retain a few MRAPs.

The Military Armor Vehicle market is complemented by the Weapons market and the Automotive Market. Most of the modern-day programs like the Stryker is aimed at higher resistance and lower weight, this would also facilitate higher mobility. Most of the MBT programs around the world are focusing on two specific aspects on MBT engines, it includes reduce the heat exhaust from the engines and increasing the range. Reducing the heat is an important aspect due to detectability of the MBT using Infrared, secondly, reduced exhaust temperature would help troops take cover close to the MBT during closed combat.

The key area of focus in the Armored Personnel Carrier is to reduce the exposure of the gunner to enemy fire. As an outcome of this, the gunner would be able to operate the gun from inside the vehicle using remotely operated weapon. The remotely operated weapon also includes features like independent control for the commander to locate enemy targets. Israeli platforms like the Eitan 8X8 APC uses these remotely operated 0.50 Cal machine Gun and 30/40 mm automatic cannon.

The top three countries with the largest armored vehicle fleet are Russia, China and US. The Armored Personnel Carrier (APC) accounts for the biggest share of the total fleet.

However, the biggest evolution of the Armored Vehicle Market is the slow transformation from Passive Armor to Active Protection Systems (APS). The market is transforming towards eliminating the source of threat, compared to earlier generation of passive armor, which focused on withstanding the impact of the projectile. The APS was used predominantly on MBTs; however the effectiveness of the system is catalyzing its adoption in the APC segment as well. The cost of the APS system varies from USD 200,000 to USD 1 Million, depending on the functionalities and platform. This is also one of the fastest growing segments in the Military Armored Vehicle market.

SCOPE

The study period of the report titled “Global Military Armored Vehicle Market” is between 2017-2027, however the forecast period is between 2019-2027. The market is segmented based on Region, Platform, Component, Armor and Mobility. Please refer to the Table of Content for detailed segmentation in the Market Forecast chapters.

REASONS TO BUY

The Military Armored Vehicle market report could be of help to investment bankers or financial institutions who are considering investments in this market.

The key Active Protection system platforms have been covered in detailed in the Technologies Chapter

The report also covers a detailed PEST Analysis and Porter's Five Forces. The EU countries are working towards a single European Main Battle Tank Program as a part of their overall cost optimization. The joint program development is an example of seamless Political cohesiveness.

The report also covers a detailed country analysis, this chapter covers around ten countries with largest armored vehicle fleet. The country analysis includes a detailed import and export analysis over the past eight years.

The drivers, restraints and challenges of the military armored vehicle market are covered in detailed in a separate chapter. One of the key drivers in this market are the increase in Conflict, these could be domestic conflicts, or it could be escalation of conflicts in North Korea or Iran.

The Market Forecast Chapter has been designed keeping in mind the usefulness of this report to the component manufacturers. There is a separate section in Market Forecast Chapter which covers the Platform wise component market.

The high growth market across the market segments have been identified and represented in a separate chapter titled "Opportunity Analysis".

The Chapter titled Events Based Forecast covers various two Scenarios. The input for the Scenarios has been based on the factors which could impact the market.

The chapter titled "Events Based Forecast", identifies the key factors which are expected to affect the Military Armored vehicle market. The implications of these factors on the market have been analyses through two scenarios.

 - 8.3.2 Europe
 - 8.3.3 Asia Pacific
 - 8.3.4 Middle East
 - 8.3.5 Rest of the World

9 MARKET FORECAST GLOBAL MILITARY ARMORED VEHICLE MARKET BY ARMOR TO 2027

- 9.1 Total Global Market by Armor to 2027
- 9.2 Total Global Market by Armor (By Product) to 2027
 - 9.2.1 Active Armor
 - 9.2.2 Passive Armor
- 9.3 Total Global Market by Armor (Region wise) to 2027
 - 9.3.1 Active Armor
 - 9.3.2 Passive Armor

10 OPPORTUNITY ANALYSIS

- 10.1 By Region
- 10.2 By Platform
- 10.3 By Component
- 10.4 By Mobility
- 10.5 By Armor
