Abstracts

The military training and simulation market can be segmented as Live, Virtual and Constructive (LVC). Live Training refers to the use of actual equipment, ammunition and personnel, these trainings are expensive due to the near recreation of combat zone scenario. Virtual Training is the use of gaming technology to recreate the environment for training purposes, this is one of the fastest growing segments. Higher adoption of technology like the VR and AR that helps in a close to reality simulated environment are expected to drive this segment. Constructive Training and Simulation is scenario is created and a simulated environment is created, the higher need for interoperability amongst the various platforms used for training are expected to drive this segment of the market.
