Abstracts

The increase in insurgency and the increase in terrorist incidents within the country have acted as key drivers in the Military Small Arms Market. It is estimated that there are more than 1 billion Small Arms, Globally, including the Civilian sector. A major portion of the Civilian Arms account to unregistered arms which in turn leads to unprovoked violence. There have been around 277 incidents, which have been reported between 2000 to 2018 in which around 884 were killed and 1,546 were wounded.

In case of US, the Government empowered the Homeland Security with Military grade weapons to curtail the growing risk of gun violence. The exponential increase of violence combined with the pressure to curtail such incidents and militarization of the Police forces have led to the use of extreme aggression by the police forces, in specific cases.

The total Global Market for Military Small Arms is estimated at around USD 6.29 billion in 2020 and the market is expected to grow to USD 7.59 billion by 2028. The Global Military Small Arms market is expected to grow at a CAGR of around 2.10%. Revolvers and Pistols is expected to account to around one- third of the market, predominantly driven by its procurement by the Homeland Security market. The Civilian market and the ammunition market are not included in the scope of this report.
