Abstracts

The increase in complexity of warfare led to increase in casualties, the combat zones in Vietnam, Korea, Iraq and Afghanistan had their individual challenges. The need for increasing the survivability forced nations to equip the soldiers with state-of-the-art protection and combat systems. Ironically, the effect has been a sharp rise in post war non-combat injuries that pointed at excessive load as the cause for the musculoskeletal injuries. The Defense Departments across the world are focusing on manufacturing innovative material which is lighter in weight and stronger in performance.

The cumulative market is expected to surpass USD 96 Billion during the forecast period. The market is estimated at around USD 9.24 Billion in 2019 and is expected to reach USD 12.83 Billion in 2027 at a CAGR of around 3.7%. The market is expected to move from Independent equipment to Integrated equipment through the study period. The APAC market is expected to account to more than one- third of the Global Soldier Systems market.
