## Abstracts

The constant struggle for supremacy between a successful submarine mission and a submarine neutralization has fueled the innovations in the submarine market. This power struggle has also indirectly acted as a catalyst for the ASW market. Unlike the Air platforms, the harsh environmental conditions acts as a key barrier for the endurance of these platforms. The unmanned platforms are predominantly powered by battery, however it is expected that alternate sources of power, like fuel cells could be implemented in the near future.

The undersea warfare market is estimated at around USD 19 Billion in 2020 and is expected to reach USD 26 Billion by 2028. The market is expected to grow at a CAGR of around 3.60%. The fastest growing segment is expected to be the Unmanned Platforms market, this market is expected to experience double digit CAGR.
