Abstracts

UAVs today have a plethora of uses in agriculture, energy, logistics, defense, homeland security, construction, surveillance, real estate, and Media creation. UAV systems technology's utilisation is only projected to grow as a result of its diverse variety of applications. UAVs are comprised of two components, that is, hardware and software. Uninterrupted operation is due primarily to installed software that safely guides the UAV on its path and provides information on where to go and when to react.

Cloud-based software is now accessible, allowing UAVs to broaden their range of uses. Users may control and manage drone operations with a single click using UAVs featuring cloud-based software. Pre-planned, repeated missions are despatched on demand or via the flight scheduling system. To extract insights and improve decision-making processes, users can engage in real-time and process data. Stockpile volumetric measurements, recognising and counting individuals or objects, and security applications such as detecting breaches and movement are a few examples of UAV software applications.

The Global UAV Software Market acquired a market value of US\$3.48 bn in the year 2021. The market is anticipated to grow with a CAGR of 5% between the forecast period of 2022-2030. In 2021, North America gained a market value of US\$1.05 bn, and its the largest regional segment within the Global UAV Software Market. North America is expected to continue to be the biggest market with a value of US\$1.73 bn in 2029. On studying the regional competitive mapping, APAC is expected to be the fastest-growing segment with a CAGR of 6.3% over the forecast period. This is owing to the presence of countries like India, China, Japan, South Korea, and others in the APAC region. The increased investment in the military modernization programs in the defense sector and rising use of UAVs for commercial, civil and other applications is another factor that is

expected to spur the economic growth for APAC region.

Market analysis for the architecture segmentation conveys that Open-Source architecture account for roughly 66% of the market value generated by the Global UAV Software Market. It is also the fastest-growing segment with a CAGR of 6.6% between the forecast period 2022-2030. The interface market for UAV Software is another supply segment within this sector. Android, and Windows are expected to be the fastest-growing segment within this market with a CAGR of 5.99% respectively. The growth in the increased use of UAVs for various applications, including commercial applications is anticipated to drive the growth dynamics.

This report is aimed at:

Key market trends and their impacts on the changing market dynamics have been discussed.

The technologies within this market have been studied based on the various applications.

A comprehensive study based on the drivers, restraints, and challenges of this market has been covered.

The impact of growing technological advancement on the market as well as its demand has been studied.

The high growth markets have been studied briefly and the trends across this vertical have also been studied.

The new opportunities provided by this market have been listed.

The industrial shortcomings and the performance of the key players for this market have been analyzed.

Segmentation

This report has been segmented by Region, Architecture (Hardware), Drone, and Interface.

Region

North America

Europe

Reasons to buy

Determine prospective investment areas based on a detailed trend analysis of the global UAV Software industry over the next eight years

Gain in-depth understanding about the underlying factors driving demand for

different systems segments in the top spending countries across the world and identify the opportunities offered by each of them

Strengthen your understanding of the market in terms of demand drivers, industry trends, and the latest technological developments, among others

Identify the major channels that are driving the UAV Software business, providing a clear picture about future opportunities that can be tapped, resulting in revenue expansion

Make correct business decisions based on thorough analysis of the total competitive landscape of the sector with detailed profiles of the top systems providers around the world which include information about their products, alliances, recent contract wins and financial analysis wherever available

Contents

1 INTRODUCTION

- 1.1 Objective
- 1.2 Market definition
- 1.3 Methodology
- 1.4 Events based Forecast Scenario
- 1.5 Who will benefit from this report?
- 1.6 Language

2 EXECUTIVE SUMMARY

- 2.1 UAV Software Market Trends and Insights
- 2.2 Top 5 Major Findings
- 2.3 Major Conclusions
- 2.4 Important Tables and Graphs

3 CURRENT MARKET OVERVIEW GLOBAL UAV SOFTWARE MARKET 2021-2029

- 3.1 Market Introduction
 - 3.1.1 Classification of UAV System
- 3.2 Components of UAV System
 - 3.2.1 Airframes
 - 3.2.2 Flight Control System
 - 3.2.3 Ground Control Station
 - 3.2.4 Data Link
 - 3.2.5 Payload
- 3.3 Trends and Technologies
 - 3.3.1 Style of Control
 - 3.3.2 Command Control and Communication
 - 3.3.3 Sense and Avoid System
 - 3.3.4 Autopilots
 - 3.3.5 Sensing Technologies

4 MARKET ANALYSIS AND FORECAST FACTORS

- 4.1 Market Segmentation of Global UAV Software Market
- 4.2 Forecast factors

4.3 Drivers

- 4.3.1 Increased Applications of UAV
- 4.3.2 Integration of Drones into Non-Segregated Airspace
- 4.3.3 Advancement of Communication Technologies
- 4.3.4 Increased Tactical Role of UAVs
- 4.3.5 Growing Air Traffic

4.4 Restraints

- 4.4.1 Developments in Anti-Drone Technology
- 4.4.2 Government Regulations

4.5 Challenges

- 4.5.1 Privacy concerns
- 4.5.2 Integration of UAVs

5 FORECAST UAV SOFTWARE MARKET TO 2029 BY REGION

5.1 UAV Software market by Region overview

5.2 UAV Software market Regions by End-User

- 5.2.1 North American UAV Software in Defense and Aerospace market by End-User
- 5.2.2 European UAV Software in Defense and Aerospace market by End-User
- 5.2.3 APAC UAV Software in Defense and Aerospace market by End-User
- 5.2.4 Middle East UAV Software in Defense and Aerospace market by End-Users
- 5.2.5 RoW UAV Software in Defense and Aerospace market by End-Users

5.3 UAV Software market Regions by Application

- 5.3.1 North American UAV Software in Defense and Aerospace market by Application
- 5.3.2 European UAV Software in Defense and Aerospace market by Application
- 5.3.3 APAC UAV Software in Defense and Aerospace market by Application
- 5.3.4 Middle East UAV Software in Defense and Aerospace market by Application
- 5.3.5 RoW UAV Software in Defense and Aerospace market by Application

6 FORECAST UAV SOFTWARE MARKET TO 2029 BY ARCHITECTURE

6.1 Global UAV Software market by Architecture overview

6.2 Global UAV Software Architecture market by Drone

- 6.2.1 Global Open-Source UAV Software Architecture in Defense and Aerospace market by Drone
- 6.2.2 Global Customized UAV Software Architecture in Defense and Aerospace market by Drone

6.3 Global Open Source UAV Software Architecture Market by Hardware

- 6.3.1 Global Open Source UAV Software Architecture for Fixed Drones market by

Hardware

6.3.2 Global Open Source UAV Software for Rotary Wing Drones by Hardware

6.4 Global Customized UAV Software Architecture Market by Hardware

6.4.1 Global Customized UAV Software Architecture for Fixed Drones market by Hardware

6.4.2 Global Customized Source UAV Software for Rotary Wing Drones by Hardware

7 FORECAST UAV SOFTWARE MARKET TO 2029 BY INTERFACE

7.1 Global UAV Software Market by Interface overview

8 OPPORTUNITY ANALYSIS

8.1 By Region

8.2 By Architecture

8.3 By Interface

9 SCENARIO ANALYSIS

9.1 Introduction

9.2 Scenario Analysis

9.3 Scenario Analysis

10 LEADING COMPANIES IN THE UAV SOFTWARE MARKET

10.1 BAE Systems

10.1.1 Introduction

10.1.2 Developments

10.2 Elbit Systems Ltd.

10.2.1 Introduction

10.2.2 Developments

10.3 Israel Aerospace Industries

10.3.1 Introduction

10.3.2 Developments

10.4 Insitu Pacific

10.4.1 Introduction

10.4.2 Developments

10.5 General Atomics

10.5.1 Introduction

- 10.5.2 Developments
- 10.6 AeroVironment, Inc.
 - 10.6.1 Introduction
 - 10.6.2 Developments
- 10.7 Lockheed Martin Corporation
 - 10.7.1 Introduction
 - 10.7.2 Developments
- 10.8 Northrop Grumman Corporation
 - 10.8.1 Introduction
 - 10.8.2 Development
- 10.9 Neurala
 - 10.9.1 Introduction
 - 10.9.2 Developments
- 10.10 Precision Hawk
 - 10.10.1 Introduction
 - 10.10.2 Developments
- 10.11 Archangel Imaging Ltd.
 - 10.11.1 Introduction
 - 10.11.2 Developments
- 10.12 Atkins
 - 10.12.1 Introduction
 - 10.12.2 Developments
- 10.13 Altitude angle
 - 10.13.1 Introduction
 - 10.13.2 Developments
- 10.14 Terabee
 - 10.14.1 Introduction
 - 10.14.2 Developments
- 10.15 Parrot
 - 10.15.1 Introduction
 - 10.15.2 Developments
- 10.16 Dryad Networks
 - 10.16.1 Introduction
 - 10.16.2 Developments
- 10.17 Skider
 - 10.17.1 Introduction
 - 10.17.2 Developments
- 10.18 Geoscan
 - 10.18.1 Introduction

- 10.18.2 Developments
- 10.19 Wesii
 - 10.19.1 Introduction
 - 10.19.2 Developments
- 10.20 AGROROBOTICA
 - 10.20.1 Introduction
 - 10.20.2 Developments
- 10.21 Archon
 - 10.21.1 Introduction
 - 10.21.2 Developments
- 10.22 Unleash live
 - 10.22.1 Introduction
 - 10.22.2 Developments
- 10.23 National Drones
 - 10.23.1 Introduction
 - 10.23.2 Developments
- 10.24 Datumate
 - 10.24.1 Introduction
 - 10.24.2 Developments
- 10.25 Vhive
 - 10.25.1 Introduction
 - 10.25.2 Developments
- 10.26 SkyX
 - 10.26.1 Introduction
 - 10.26.2 Developments
- 10.27 Auterion
 - 10.27.1 Introduction
 - 10.27.2 Developments
- 10.28 INVOLI
 - 10.28.1 Introduction
 - 10.28.2 Developments
- 10.29 Paras Aerospace
 - 10.29.1 Introduction
 - 10.29.2 Developments
- 10.30 Skydio
 - 10.30.1 Introduction
 - 10.30.2 Developments
- 10.31 Delair
 - 10.31.1 Introduction

- 10.31.2 Developments
- 10.32 Propeller
 - 10.32.1 Introduction
 - 10.32.2 Developments
- 10.33 Flirtey
 - 10.33.1 Introduction
 - 10.33.2 Development
- 10.34 DroneSense
 - 10.34.1 Introduction
 - 10.34.2 Development
