Aerospace and Defense Global Industry Almanac 2015-2024

SUMMARY

Global Aerospace & Defense industry profile provides top-line qualitative and quantitative summary information including: market size (value 2015-19, and forecast to 2024). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The aerospace & defense market consists of (1) the civilian aerospace market and (2) the military aerospace and defense market.

One should note that there are many sub-sections included in the military aerospace and defense market; too many to be included here. A complete list of all included sub-sections can be provided upon request.

The civilian aerospace market is comprised of the revenues accrued by manufacturers from all civilian aerospace procurement.

The military aerospace and defense market is comprised of the sum of the revenues generated from (a) signed deals that remain under contract and (b) new contracts signed within a particular calendar year. This market is segmented to include military aircraft, military vehicles, naval vessels, and systems & ordnance. The military aircraft segment is comprised of aircraft

engines, aviation MRO, defense helicopters, and military avionics, rotocraft, satellites, UAVs and others. The military vehicles segment is comprised of armored vehicles and related MRO operations, unmanned ground vehicles, vehicle armor and others. The naval vessels segment is comprised of maritime and border security, naval engines, naval vessels and related MRO operations, submarines and related MRO operations and any other undersea warfare. The systems & ordnance segment is comprised of ammunition, artillery, biometric systems, body armor, communications equipment, cybersecurity, electronic warfare, navigational systems, radars, IT and computing systems, simulation systems, missiles and missile defense systems, all ordnance and guns, soldier modernization, communications, avionics and others.

Any currency conversions used in the creation of this report have been calculated using constant 2019 annual average exchange rates.

Figures presented in this report are calculated applying the 'middle path' scenario - this is based on the current situation in countries where the epidemic burst first, like China as a model countries and the announcements made by governments, stating that the abnormal situation may last up to six months.

The assumption has been made that after this time the economy will gradually go back to the levels recorded before the pandemics by the end of the year. It is also assumed that there is no widespread economic crisis as seen back in 2008 due to announced pay-outs across countries.

At the moment of preparation of this report in April 2020 the economic implications of the lock downs of many economies are still very difficult to predict as there is no indication how long the pandemics could last, the number of sectors forced to stay closed and the scale of the governmental aid involved. At the same time the weight of the pandemic seriousness is applied on the individual countries in this report based on death to population ratio recorded in countries.

Majority of the industries will see the decline in volume of the goods and services offered by companies. Usually the lower demand would cause the decrease the prices level. However, amid many governments' ordered for many industries to lock down and so the supply chain is distorted that in great pictures mitigate the results of lower demand.

Applied scenarios differ depending on the individual sector, however generally sectors which involves intensive manual labor and face to face interaction seem to be hit the most by present situation. On the other hand the internet based businesses as well as the producers of the vital, subsisted products and services seems to take advantages of the current events.

The global aerospace & defense market had total revenues of \$1,429.5bn in 2019, representing a compound annual growth rate (CAGR) of 4.7% between 2015 and 2019.

The civil aerospace segment was the market's most lucrative in 2019, with total revenues of \$711.5bn, equivalent to 49.8% of the market's overall value.

The US is the world's largest aerospace and defense market with a global market share of 36.8% and a market value over \$525bn in 2019.

SCOPE

Save time carrying out entry-level research by identifying the size, growth, major segments, and leading players in the global aerospace & defense market

Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the global aerospace & defense market

Leading company profiles reveal details of key aerospace & defense market players' global operations and financial performance

Add weight to presentations and pitches by understanding the future growth prospects of the global aerospace & defense market with five year forecasts

REASONS TO BUY

What was the size of the global aerospace & defense market by value in 2019?

What will be the size of the global aerospace & defense market in 2024?

What factors are affecting the strength of competition in the global aerospace &

defense market?

How has the market performed over the last five years?

What are the main segments that make up the global aerospace & defense market?
