Airlines in Japan

Summary

Airlines in Japan industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

Airlines industry covers passenger air transportation, including scheduled flights but excludes air freight transport. Industry volume is defined as the total seats sold by airlines registered in a particular country or region. Industry value is defined as the total airline revenue generated from passenger traffic. It is calculated by multiplying the average revenue per passenger by the seats sold.

The Japanese airlines industry recorded revenues of \$38.1 billion in 2023, representing a compound annual growth rate (CAGR) of 1.8% between 2018 and 2023.

Industry consumption volumes declined with a negative CAGR of 1.0% between 2018 and 2023, to reach a total of 121,749.3 thousand seats in 2023.

The strong rebound in passenger demand, airline strategic initiatives, improved infrastructure, and advantageous economic conditions are all major contributors to the expansion of the airline business in Japan in 2023.
