Apparel & Non-Apparel Manufacturing in Japan

Summary

Apparel & Non-Apparel Manufacturing in Japan industry profile provides top-line qualitative and quantitative summary information including: market size (value 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The apparel & non-apparel manufacturing market is segmented into apparel and non-apparel products. The market value refers to the revenue generated by apparel and non-apparel manufacturers in a specific year.

The Japanese apparel & non-apparel manufacturing market recorded revenues of \$36,153.9 million in 2023, representing a negative compound annual growth rate (CAGR) of 8.3% between 2018 and 2023.

The apparel segment accounted for the market's largest proportion in 2023, with total revenues of \$30,266.3 million, equivalent to 83.7% of the market's overall value.

In 2023, the Japanese apparel & non-apparel manufacturing market faced a decline due to rising costs of domestic production and shrinking consumer demand. High production costs, driven by stringent labor laws, elevated wages, and increased energy prices, made it challenging for Japanese manufacturers to remain competitive against lower-cost producers in neighbouring countries like

Vietnam and Bangladesh. These factors led many companies to either offshore their manufacturing operations or reduce domestic production capacity, thereby weakening the local manufacturing base.
