Asia-Pacific (APAC) Control Systems Market Summary, Competitive Analysis and Forecast to 2027

Summary

Control Systems in Asia-Pacific industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2017-22, and forecast to 2027). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The control systems market is made up of programmable logic controllers (PLC) and distributed control systems (DCS). It does not include PC-based control systems and software. A control system is a device, or set of devices, that manages, commands, directs, or regulates the behaviour of other device(s) or system(s). Industrial control systems are used in industrial production.

The Asia-Pacific control systems market had total revenues of \$8.1 billion in 2022, representing a compound annual growth rate (CAGR) of 0.6% between 2017 and 2022.

The DCS segment accounted for the market's largest proportion in 2022, with total revenues of \$4.6 billion, equivalent to 56.7% of the market's overall value.

The market growth in 2022 is attributed to industrialization; growing demand for industrial automation such as soft and hard automation, programmable automation, and integrated automation; rising demand for operational efficiency in the manufacturing sector; and reducing overall manufacturing cost.

Scope

Save time carrying out entry-level research by identifying the size, growth, major segments, and leading players in the control systems market in Asia-Pacific

Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the control systems market in Asia-Pacific
