The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The air freight sector is defined as consisting of revenues generated from freight transportation by air.

The Australian air freight sector had total revenues of \$0.8 billion in 2022, representing a negative compound annual growth rate (CAGR) of 7.8% between 2017 and 2022.

Sector consumption volumes declined with a negative CAGR of 8.6% between 2017 and 2022, reaching a total of 1.3 billion FTK in 2022.

The Australian air freight sector has declined recently owing to several factors such as increasing interest rates and rising inflation. High-interest rates reduce access to credit for the companies involved, thereby reducing the volume of investment which negatively impacts air freight. For instance, according to the OECD, the long-term interest rates grew from 2.6% in December 2017 to 3.6%

in December 2022.
