Automotive Manufacturing in Europe

Summary

Automotive Manufacturing in Europe industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2019-24, and forecast to 2029). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The automotive manufacturing industry is segmented into car manufacturing, motorcycle manufacturing, and truck manufacturing. The electric and hybrid vehicles are out of our market scope.

The European automotive manufacturing industry recorded revenues of \$382.4 billion in 2024, representing a negative compound annual growth rate (CAGR) of 3.3% between 2019 and 2024.

Industry production volumes declined with a negative CAGR of 3.6% between 2019 and 2024, reaching a total of 16.3 million units in 2024.

The European automotive manufacturing industry's production volume contracted by 2.7% in 2024, primarily due to supply chain vulnerabilities and slowing investment in production capacity. While the global semiconductor shortage had largely stabilized, the UK and Germany continued to experience sporadic shortages of EV battery components and other critical electronic modules due to its limited local supply base.
