Biofuel Consumption in Europe

Summary

Biofuel Consumption in Europe industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

Biofuels are renewable energy sources produced from organic materials or biomass. Biofuels help in reducing greenhouse gas emissions and are therefore used as a substitute for fossil fuels such as gasoline and diesel. Market volume represents consumption of biofuel in a country in a specific year. Market value is calculated by multiplying market volume with wholesale price of biofuel.

The European biofuel consumption market recorded revenues of \$33.4 billion in 2023, representing a compound annual growth rate (CAGR) of 11.3% between 2018 and 2023.

Market consumption volume increased with a CAGR of 2.2% between 2018 and 2023, to reach a total of 178.3 million barrel in 2023.

The value market growth during 2018-2023 is attributed to government policies and regulations, environmental concerns and climate change, technological advancements, increasing demand for sustainable fuels in transportation, and growing concern for energy security.

Scope

Save time carrying out entry-level research by identifying the size, growth, and leading players in the biofuel consumption market in Europe
