### KEY HIGHLIGHTS

The casinos and gaming market consists of all forms of betting and gaming. All values are stated in terms of gross gaming win (GGR). This is the total amount waged by customers minus the total amount paid out to customers as winnings, but before the payment of any applicable taxes, disbursements to charitable or other causes by games established for those purposes, or other expenses.

The French casinos and gaming sector registered total gross gaming win of \$13,973.5m in 2020, representing a compound annual growth rate (CAGR) of 5.7% between 2016 and 2020.

The COVID-19 outbreak impacted the sector greatly in 2020. Casinos were forced to shut their business for most of the year due to the ongoing coronavirus restrictions and lockdowns.

The COVID-19 pandemic has led to either the cancellation or postponement of a number of major sporting events globally, which has disrupted this stage of the supply chain significantly.
