SUMMARY

Casinos & Gaming in the United States industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The casinos and gaming market consists of all forms of betting and gaming. All values are stated in terms of gross gaming win (GGR). This is the total amount waged by customers minus the total amount paid out to customers as winnings, but before the payment of any applicable taxes, disbursements to charitable or other causes by games established for those purposes, or other expenses.

The US casinos and gaming sector registered total gross gaming win of \$118,042.4m in 2020, representing a compound annual rate of change (CARC) of -4.9% between 2016 and 2020.

The COVID-19 outbreak impacted the sector greatly in 2020. Casinos were forced to shut their business for most of the year due to the ongoing coronavirus restrictions and lockdowns.

The COVID-19 pandemic has led to either the cancellation or postponement of a number of major sporting events globally, which has disrupted this stage of the supply chain significantly.
