Chemicals in France

SUMMARY

Chemicals in France industry profile provides top-line qualitative and quantitative summary information including: market size (value 2015-19, and forecast to 2024). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The chemicals market consists of speciality chemicals, commodity chemicals, agricultural chemicals, and other chemicals (which include products such as pharmaceutical chemicals).

The French chemicals market had total revenues of \$81.2bn in 2019, representing a compound annual rate of change (CARC) of -0.6% between 2015 and 2019.

The commodity chemicals segment was the market's most lucrative in 2019, with total revenues of \$33.4bn, equivalent to 41.2% of the market's overall value.

Despite its strong position in the European region, the market has struggled in recent years, partially due to the US-China trade war, which has depressed prices across the global chemical market as whole.
