China Fixed Line Telecoms - Market Summary, Competitive Analysis and Forecast, 2017-2026

SUMMARY

Fixed Line Telecoms in China industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value 2017-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The fixed-line telecommunications market is valued as the revenues obtained by operators for voice telephony and internet fixed lines (wirelines), rather than wireless systems. Only revenues from end-users are included, with revenues from other operators, as in wholesale transactions, excluded. This market consists of voice telephony segments Circuit-Switched and VoIP (packet-switched voice subscriptions); and internet segments Narrowband (transmission speed 128 Kbps). Volume figures are defined as fixed-line subscriptions to each of these services. All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2021 annual average exchange rates.

The Chinese fixed line telecoms market had total revenues of \$269.6bn in 2021, representing a compound annual growth rate (CAGR) of 5.5% between 2017

and 2021.

Market consumption volume increased with a CAGR of 8.6% between 2017 and 2021, to reach a total of 748.2 million subscriptions in 2021.

The market's growth accelerated in 2020 due to the COVID-19 pandemic. As virus containment measures were put in place across China, data consumption increased for fixed services.
