China New Cars Market @Summary, Competitive Analysis and Forecast to 2027

SUMMARY

New Cars in China industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2017-22, and forecast to 2027). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The new cars market consists of the initial retail sale/registration of new passenger cars. Passenger cars include saloons, hatchbacks, SUVs, 4x4s, and light pickups used predominantly in North America, and other related vehicles. The market value is calculated at retail selling price (RSP) and the market volume is given in terms of units sold. Market share data for the New Cars industry applies to motor manufacturing groups as opposed to their individual brands, i.e. for the Volkswagen Group this includes all of its brands such as Volkswagen, Audi, Skoda, Seat etc. therefore where possible, market share data represents sales figures for every brand in that manufacturing group within each country. All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2021 annual average exchange rates.

The Chinese new car market is expected to generate total revenues of \$509.2

billion in 2022, representing a compound annual growth rate (CAGR) of 1.4% between 2017 and 2022.

Market consumption volume is forecast to decline with a negative CAGR of 0.8% between 2017 and 2022, reaching a total of 24,427,200 cars in 2022.

Growth in this market has been hindered by environmental concerns in China. High pollution levels in the major urban cities have led the government to encourage consumers to revert to non-fossil fuel-burning substitutes.
