Civil Engineering in Brazil

Summary

Civil Engineering in Brazil industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The civil engineering industry includes construction work classified as civil engineering (i.e. non-buildings), excluding companies working in the home-building subsector. The market value is calculated as the value of the construction of non-buildings. Where possible values are not adjusted seasonally. All currency conversions have been calculated using constant average 2019 annual rate.

The Brazilian civil engineering sector is forecast to generate total revenues of \$35.5bn in 2020, representing a compound annual rate of change (CARC) of -1.7% between 2016 and 2020.

During the historical period the sector continued to suffer in the wake of the Odebrecht scandal.

COVID-19's wider economic impact in Brazil will suppress growth over the forecast period.
