Civil Engineering in India

Summary

Civil Engineering in India industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The civil engineering industry includes construction work classified as civil engineering (i.e. non-buildings), excluding companies working in the home-building subsector. The market value is calculated as the value of the construction of non-buildings. Where possible values are not adjusted seasonally. All currency conversions have been calculated using constant average 2019 annual rate.

The Indian civil engineering sector is expected to generate total revenues of \$229.2bn in 2020, representing a compound annual growth rate (CAGR) of 3.6% between 2016 and 2020.

Rapidly growing urbanization and a fast-growing population has led to increasing demand for suitable infrastructure including transportation, sewage and waste disposal, education, streets & highways, and water supply.

Continuing restrictions on movement in 2020 have diverted some investment away from this sector and towards healthcare and emergency measures.
