Civil Engineering in Japan

Summary

Civil Engineering in Japan industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The civil engineering industry includes construction work classified as civil engineering (i.e. non-buildings), excluding companies working in the home-building subsector. The market value is calculated as the value of the construction of non-buildings. Where possible values are not adjusted seasonally. All currency conversions have been calculated using constant average 2019 annual rate.

The Japanese civil engineering sector is expected to generate total revenues of \$386.9bn in 2020, representing a compound annual growth rate (CAGR) of 2.7% between 2016 and 2020.

The COVID-19 pandemic has had various conflicting effects in this sector, diverting public investment towards healthcare and emergency measures whilst also opening opportunities to bring forward work on major civil infrastructure projects.

The wider economic impact of the COVID-19 pandemic will almost certainly lead

to suppressed growth in the forecast period.
