Civil Engineering in Mexico

Summary

Civil Engineering in Mexico industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The civil engineering industry includes construction work classified as civil engineering (i.e. non-buildings), excluding companies working in the home-building subsector. The market value is calculated as the value of the construction of non-buildings. Where possible values are not adjusted seasonally. All currency conversions have been calculated using constant average 2019 annual rate.

The Mexican civil engineering sector is forecast to generate total revenues of \$10.3bn in 2020, representing a compound annual rate of change (CARC) of -9.2% between 2016 and 2020.

During its enforced lockdown period Mexico has seen a great deal of public investment diverted towards healthcare and emergency measures.

The wider economic impact of the COVID-19 pandemic will almost certainly lead to suppressed growth in the forecast period.
