Leading company profiles reveal details of key construction market players' global operations and financial performance

Add weight to presentations and pitches by understanding the future growth prospects of the Venezuela construction market with five year forecasts

SYNOPSIS

Essential resource for top-line data and analysis covering the Venezuela construction market. Includes market size and segmentation data, textual and graphical analysis of market growth trends, leading companies and macroeconomic information.

REASONS TO BUY

What was the size of the Venezuela construction market by value in 2016?

What will be the size of the Venezuela construction market in 2021?

What factors are affecting the strength of competition in the Venezuela construction market?

How has the market performed over the last five years?

What are the main segments that make up Venezuela's construction market?

KEY HIGHLIGHTS

The construction industry is defined as the value of work put in place annually in the residential, non-residential, and civil engineering segments. The residential segment covers houses, dwellings, and similar work. The non-residential segment covers commercial, industrial, social, and similar work. Civil engineering covers infrastructure for transportation, telecommunications, energy, and other purposes.

The Venezuelan construction industry is expected to generate total revenues of \$9.7bn in 2016, representing a compound annual growth rate (CAGR) of 2.6% between 2012 and 2016.

The residential segment is expected to be the industry's most lucrative in 2016, with total revenues of \$3.8bn, equivalent to 39.4% of the industry's overall value.

The performance of the industry is forecast to accelerate, with an anticipated CAGR of 3.6% for the five-year period 2016 - 2021, which is expected to drive the industry to a value of \$11.6bn by the end of 2021.
