Construction Materials Market @Summary, Competitive Analysis and Forecast, 2017-2026 (Global Almanac)

### SUMMARY

Global Construction Materials industry profile provides top-line qualitative and quantitative summary information including: market size (value 2017-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The construction materials market consists of cement, aggregates, and bricks.

The cement segment includes hydraulic cement (e.g. Portland cement), but excludes solid concrete.

The aggregates segment includes sand, gravel and crushed rocks and stones used in construction, but excludes industrial sand (used in glass making etc) and similar materials.

The bricks segment includes building blocks and pipes made from fired clay or concrete.

Other finished or semi-finished building materials and components are excluded.

Values refer to consumption of construction materials within the specified geography, whether produced domestically or imported. The market has been valued at manufacturers selling price (MSP).

All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2021 annual average exchange rates.

The global construction materials market had total revenues of \$1,052.7 billion in 2021, representing a compound annual growth rate (CAGR) of 5.7% between 2016 and 2021.

The cement segment was the market's most valuable in 2021, with total revenues of \$372.3 billion, equivalent to 35.4% of the market's overall value.

Shortages of key materials and associated rising prices for such materials have impacted the progress of construction projects.

## **SCOPE**

Save time carrying out entry-level research by identifying the size, growth, major segments, and leading players in the global construction materials market

Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the global construction materials market

Leading company profiles reveal details of key construction materials market players' global operations and financial performance

Add weight to presentations and pitches by understanding the future growth prospects of the global construction materials market with five year forecasts

## **REASONS TO BUY**

What was the size of the global construction materials market by value in 2021?

What will be the size of the global construction materials market in 2026?

What factors are affecting the strength of competition in the global construction materials market?

How has the market performed over the last five years?

What are the main segments that make up the global construction materials market?
