Control Systems in Asia-Pacific - Market Summary, Competitive Analysis and Forecast to 2025

### SUMMARY

Control Systems in Asia-Pacific industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### **KEY HIGHLIGHTS**

The control systems market is made up of programmable logic controllers (PLC) and distributed control systems (DCS). It does not include PC-based control systems and software. A control system is a device, or set of devices, that manages, commands, directs or regulates the behavior of other device(s) or system(s). Industrial control systems are used in industrial production.

The Asia-Pacific control systems market had total revenues of \$7.6bn in 2020, representing a compound annual rate of change (CARC) of -0.5% between 2016 and 2020.

The DCS segment was the market's most lucrative in 2020, with total revenues of \$4.3bn, equivalent to 57% of the market's overall value.

Looking forward, the Asia-Pacific control systems market could benefit from the

introduction of government policies aimed at boosting the industrial sector, which would create opportunities for control systems companies to enter new markets and boost sales.
