SUMMARY

Control Systems in Japan industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The control systems market is made up of programmable logic controllers (PLC) and distributed control systems (DCS). It does not include PC-based control systems and software. A control system is a device, or set of devices, that manages, commands, directs or regulates the behavior of other device(s) or system(s). Industrial control systems are used in industrial production.

The Japanese control systems market had total revenues of \$2.3bn in 2020, representing a compound annual growth rate (CAGR) of -3.7% between 2016 and 2020.

The DCS segment was the market's most lucrative in 2020, with total revenues of \$1.4bn, equivalent to 59% of the market's overall value.

The COVID-19 pandemic has had a significant impact on the Japanese control

systems market. Strict border restrictions have disrupted supply chains and access to manufacturing materials, whilst economic difficulties has caused demand for control systems products to drop.
