## Abstracts

### Control Systems in Asia-Pacific

#### Summary

Control Systems in Asia-Pacific industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

#### Key Highlights

The control systems market includes programmable logic controllers (PLC) and distributed control systems (DCS). It does not include PC-based control systems and software. A control system is a device, or set of devices, that manages, commands, directs, or regulates the behaviour of other devices or systems.

The Asia-Pacific control systems market recorded revenues of \$8,729.4 million in 2023, representing a compound annual growth rate (CAGR) of 1.6% between 2018 and 2023.

The DCS segment accounted for the market's largest proportion in 2023, with total revenues of \$5,192 million, equivalent to 59.5% of the market's overall value.

The market growth in 2023 is attributed to industrialization; growing demand for industrial automation such as soft and hard automation, programmable automation, and integrated automation; rising demand for operational efficiency in the manufacturing sector; and reducing overall manufacturing cost.
