## Abstracts

### Control Systems in Japan

#### Summary

Control Systems in Japan industry profile provides top-line qualitative and quantitative summary information including: market size (value 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

#### Key Highlights

The control systems market includes programmable logic controllers (PLC) and distributed control systems (DCS). It does not include PC-based control systems and software. A control system is a device, or set of devices, that manages, commands, directs, or regulates the behaviour of other devices or systems.

The Japanese control systems market recorded revenues of \$1,965.2 million in 2023, representing a negative compound annual growth rate (CAGR) of 5.6% between 2018 and 2023.

The DCS segment accounted for the market's largest proportion in 2023, with total revenues of \$1,157.2 million, equivalent to 58.9% of the market's overall value.

. The market recorded contraction between 2018 and 2023. This contraction is attributed to low domestic demand, rising inflation, weak private consumption, and slowing global demand impacting exports.
